

Í meðfylgjandi viðbragðsáætlun vegna niðurstöðu úr botnsýnatöku má sjá hvernig Arnarlax hyggst bregðast mismunandi niðurstöðum.

Eins og greint er frá í viðbragðsáætluninni er ýmist gert ráð fyrir að bregðast við slæmum niðurstöðum með því að minnka lífmassa, auka hvíld, færa kvíar til innan eldissvæðis eða setja ekki út seiði á viðkomandi eldissvæði og eftir atvikum, nota önnur eldissvæði innan sama sjókvíaldissvæðis.

Niðurstaða í hámarkslífmassa mun gefa ákveðna vísbendingu um stöðu eldissvæða eftir að hvíldartíma líkur og hugsanlega verður gerð auka sýnataka eftir að eldistíma líkur til að meta ástandið betur.

Allar ákvarðanir um viðbrögð við niðurstöðum úr botnsýnatökum verða teknar í samvinnu við Umhverfisstofnun og eftir atvikum aðrar stofnanir og eftirlitsaðila.

Hringsdalur							
Sampling results after resting period (MOM-B)	Action	Reaction from Arnarlax in collaboration with regulators					
1 Svært God	regular resting period and biomass	Farming according to plan					
2 God	regular resting period and biomass	Farming according to plan					
3 Moderat	Notify regulators	Farming according to plan	Increase resting time after harvesting	Move cages within farming areas	Reduce biomass		
4 Darligt	Notify regulators		Increase resting time after harvesting	Move cages within farming areas	Reduce biomass	Stop using site/use Kirkjuból site	
5 Svært darligt	Notify regulators		Increase resting time after harvesting	Move cages within farming areas	Reduce biomass	Stop using site/use Kirkjuból site
